Subject: Fire Hydrant Testing

Mansfield Fire Dept. will begin a fire hydrant flow testing and flushing program starting June 1, 2015. The program will continue thru-out the summer until all hydrants have been tested and flowed. Personnel will begin testing and flushing hydrants in the southern part of Mansfield and work their way out north to the airport.

Testing will normally be conducted between 9am and 4pm. Citizens may experience temporary low flow pressure or water discoloration. During times of testing, hydrants could be left open and continue to flow until testing is complete.

Testing will be in the area of:

Hanley Rd. at Main St. North to Cook Rd. and Middle Bellville Rd. at Hanley Rd. North up to Logan Rd.

Water Repair and Utility Collections will answer any questions or concerns. All Fire Stations and Water Repair Dept. have packets of rust out. All changes to the testing schedule can be found on the city's web site.
